

### ABSTRACT OF THE DISCLOSURE

A seamed, conformable belt including a substrate having first and second opposing substantially planar surfaces, a first end, and a second end, wherein the first end and the second end of the substrate form a first seam, and an elastomeric layer having a first end and a second end, wherein the elastomeric layer is adjacent and in contact with the first surface of the substrate and wherein the first end and the second end of the elastomeric layer form a second detachable, substantially planar seam.
